

Donations Policy

Green Risk Solutions (GRS) is committed to supporting social causes through donations. Contributions or donations are transactions whereby one entity or person makes an unconditional voluntary transfer to another, without agreeing to receive an equal value in reciprocity.

Contributions are usually the primary source of any NGO, for this reason GRS is committed to allocate 5% of the company's annual income to volunteer programs and donations that work for social or environmental causes.

In order to make donations, it is important to verify that the corporation or foundation, within its objectives, ensures compliance with legal requirements regarding the receipt of contributions or donations, has a record that supports the transactions made, ensures good control and management of the resources allocated, provides uniformity in management practices regarding donations, and clearly and transparently provides the administrative and financial framework and procedures under which the resources provided are executed.

It is established that GRS will not make any type of donation in the following circumstances:

- Sponsorships or donations made in cash.
- Sponsorships or donations made in gift cards.
- Sponsorships or donations to fraternal, labor or religious organizations that only serve the interests of their members.
- Donations to a private individual.
- Sponsorships or donations to organizations that have been found to have engaged in corruption or other immoral conduct.
- Political contributions of any kind.
- Sponsorships or donations involving organizations or individuals that practice discrimination based on gender, race, color, disability, sexual orientation, or any other personal attribute.
- Sponsorships or donations to organizations whose objectives are incompatible with GRS corporate principles.
- Sponsorships or donations prohibited by law or regulation.
